World War Z Max Brooks 2006-09-12 #1 NEW YORK TIMES BESTSELLER • “Prepare to be entranced by this addictively readable oral history of the great war between humans and zombies.”—Entertainment Weekly We survived the zombie apocalypse, but how many of us are still haunted by that terrible time? We have (temporarily?) defeated the living dead, but at what cost? Told in the haunting and riveting voices of the men and women who witnessed the horror firsthand, World War Z is the only record of the pandemic. The Zombie War came unthinkable close to eradicating humanity. Max Brooks, driven by the urgency of preserving the acid-etched first-hand experiences of the survivors, traveled across the United States of America and throughout the world, from decimated cities that once teemed with upwards of thirty million souls to the most remote and inhospitable areas of the planet. He recorded the testimony of men, women, and sometimes children who came face-to-face with the living, or at least the undead, hell of that dreadful time. World War Z is the result. Never before have we had access to a document that so powerfully conveys the depth of fear and horror, and also the ineradicable spirit of resistance, that gripped human society through the plague years. THE INSPIRATION FOR THE MAJOR MOTION PICTURE “Will spook you for real.”—The New York Times Book Review “Possesses more creativity and zip than entire crates of other new fiction titles. Think Mad Max meets The Hot Zone. . . . It’s Apocalypse Now, pandemic-style. Creepy but fascinating.”—USA Today “Will grab you as tightly as a dead man’s fist. A.”—Entertainment Weekly, EW Pick “Probably the most topical and literate scare since Orson Welles’s War of the Worlds radio broadcast. . . . This is action-packed social-political satire with a global view.”—Dallas Morning News

Taming Their Pet Sara Fields 2017-12-13 Thiers to Tame. Thiers to Train. When the scheming of her father's political enemies makes it impossible to continue hiding the fact that she is an unauthorized third child, twenty-year-old Isabella Bedard is sent to a detention facility in deep space where she will be prepared for her new life as an alien's bride. Her situation is made far worse after some ill-advised mischief forces the strict warden to ensure that she is sold as quickly as possible, and before she knows it, Isabella is standing naked before two huge, roughly handsome alien men, helpless and utterly on display for their inspection. More disturbing still, the men make it clear that they are buying her not as a bride, but as a pet. Zack and Noah have made a career of taming even the most headstrong of females, and they waste no time in teaching their new pet that her absolute obedience will be expected and even the slightest defiance will earn her a painful, embarrassing bare-bottom spanking, along with far more humiliating punishments if her behavior makes it necessary. Over the coming weeks, Isabella is trained as a pony and as a kitten, and she learns what it means to fully surrender her body to the bold dominance of two men who will not hesitate to claim her in any way they please. But though she cannot deny her helpless arousal at being so thoroughly mastered, can she truly allow herself to fall in love with men who keep her as a pet? Publisher's Note: Taming Their Pet is a stand-alone novel which is the third book in the Captive Brides series. It includes spankings and sexual scenes. If such material offends you, please don't buy this book.

Unreported Truths about Covid-19 and Lockdowns Alex Berenson 2020-08-03 From former New York Times reporter Alex Berenson, the second installment in the best-selling series that offers hard data about the coronavirus epidemic - rather than hysterical predictions of doom.While Unreported Truths Part 1 focused on how many people are dying from COVID-19, this section discusses an equally important but even more complex topic: the history of lockdowns, and the evidence that they work as intended. Like Part 1, this section draws on primary sources like Centers for Disease Control and World Health Organization reports, along with news articles, government documents, and scientific papers.In three chapters, this section explains the surprising scientific debate around lockdowns BEFORE March, along with the evidence that they did or did not work as intended to reduce the spread of the coronavirus and save lives. If you have been wondering whether lockdowns made any difference - as the media has loudly insisted - Part 2 will give you the truthful, accurate and well-sourced information you need to make up your own mind.Please note: This booklet contains only the second section of Unreported Truths. Part 1 is available separately.

Inconspicuous Consumption Tatiana Schlossberg 2019-08-27 *First Place Winner of the Society of Environmental Journalists' Rachel Carson Environment Book Award* "If you're looking for something to cling to in what often feels like a hopeless conversation, Schlossberg's darkly humorous, knowledge-is-power, eyes-wide-open approach may be just the thing."--Vogue From a former New York Times science writer, this urgent call to action will empower you to stand up to climate change and environmental pollution by making simple but impactful everyday choices. With urgency and wit, Tatiana Schlossberg explains that far from being only a distant problem of the natural world created by the fossil fuel industry, climate change is all around us, all the time, lurking everywhere in our convenience-driven society, all without our realizing it. By examining the unseen and unconscious environmental impacts in four areas-the Internet and technology, food, fashion, and fuel - Schlossberg helps readers better understand why climate change is such a complicated issue, and how it connects all of us: How streaming a movie on Netflix in New York burns coal in Virginia; how eating a hamburger in California might contribute to pollution in the Gulf of Mexico; how buying an inexpensive cashmere sweater in Chicago expands the Mongolian desert; how destroying forests from North Carolina is necessary to generate electricity in England. Cataloging the complexities and frustrations of our carbon-intensive society with a dry sense of humor, Schlossberg makes the climate crisis and its solutions interesting and relevant to everyone who cares, even a little, about the planet. She empowers readers to think about their stuff and the environment in a new way, helping them make more informed choices when it comes to the future of our world. Most importantly, this is a book about the power we have as voters and consumers to make sure that the fight against climate change includes all of us and all of our stuff, not just industry groups and politicians. If we have any hope of solving the problem, we all have to do it together. "A compelling-

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

History of the Wyoming Capitol. A Starley Talbott & Linda Graves Fabian 2019 Prior to Wyoming becoming the forty-fourth state in the Union on July 10, 1890, the territorial legislature passed a bill authorizing the construction of a capitol at a maximum cost of \$150,000. Governor Warren signed the bill on March 4, 1886, and appointed the Capitol Building Commission, which purchased a site on Hill Street, now Capitol Avenue, at a cost of \$13,100. Many changes have occurred since the 1887 laying of the cornerstone. Recent renovations upgraded the capitol's Classical style and striking gold-leaf dome. The most important room, where women's right to vote began, has been restored to its original grandeur. Authors Starley Talbott and Linda Graves Fabian celebrate these and other historic firsts in this history of the state capitol building.
